# Public consultation on strengthening the quality of corporate reporting and its enforcement

Fields marked with \* are mandatory.

#### Introduction

This consultation is now available in 23 European Union official languages.

Please use the language selector at the top of this page to choose your language for this consultation.

High quality and reliable corporate reporting is of key importance for healthy financial markets, business investment and economic growth. The <u>EU corporate reporting framework</u> should ensure that companies publish the right quantity and quality of relevant information allowing investors and other interested stakeholders to assess the company's performance and governance and to take decisions based on it. High quality reporting is also indispensable for cross-border investments and the development of the <u>capital markets union (CMU)</u>.

In the context of this consultation, corporate reporting comprises the financial statements of companies, their management report that includes the non-financial and corporate governance statements and country-by-country reporting. It would also include sustainability information pursuant to the <u>proposed Corporate Sustainability Reporting Directive</u>.

The consultation takes into account the outcomes of the 2018 consultation on the EU framework for public reporting by companies and the 2021 fitness check on the EU framework for public reporting by companies. This consultation however focuses on companies listed on EU regulated markets (hereafter 'listed companies' or 'issuers'), that is a subset of the companies subject to public reporting requirements under EU law. Please note that in terms of reporting, this consultation does not seek the views of stakeholders on the applicable accounting standards, such as International Financial Reporting Standards (IFRS) or the standards in the Accounting Directive, or the views of stakeholders on public country-by-country reporting or the Commission's proposal for a Corporate Sustainability Reporting Directive.

The 2018 consultation did not cover the areas of corporate governance or statutory audit. Therefore, this consultation contains questions to evaluate aspects of the <a href="Audit Regulation 537/2014">Audit Directive 2006/43/EC</a> and of <a href="Accounting Directive 2013/34/EU">Accounting Directive 2013/34/EU</a>. However, it covers the EU framework on corporate governance only in so far as relevant for corporate reporting by listed companies and the statutory audit of so-called public interest entities (PIEs). Listed companies, credit institutions, insurance undertakings and entities designated as such by Member States are PIEs.

This consultation also builds on the work carried out by the <u>European Securities and Markets Authority (ESMA)</u> and the <u>Committee of European Audit Oversight Bodies (CEAOB)</u>.

This consultation is divided into 5 parts

- The first part seeks your views about the overall impact of the EU framework on the three pillars of high quality and reliable corporate reporting - corporate governance, statutory audit and supervision. It also seeks your views about the interaction between the three pillars
- The second part of the questionnaire focuses on the corporate governance pillar, as far as relevant for corporate reporting. It aims to get your feedback in particular on the functioning of company boards, audit committees and your views on how to improve their functioning
- The third part focuses on the statutory <u>audit pillar</u>. The first questions in this part aim at getting your views on the
  effectiveness, efficiency and coherence of the EU audit framework. It focuses in particular on the changes
  brought by the <u>2014 audit reform</u>. Subsequently, the questions aim to seek views on how to improve the
  functioning of statutory audit
- The fourth part asks questions about the supervision of PIE statutory auditors and audit firms
- Finally, the consultation will ask questions about the supervision of corporate reporting and how to improve it

This consultation will directly feed into an impact assessment that the Commission will prepare in 2022 with a view to possibly amend and strengthen the current EU rules.

Please note: In order to ensure a fair and transparent consultation process only responses received through our online questionnaire will be taken into account and included in the report summarising the responses. Should you have a problem completing this questionnaire or if you require particular assistance, please contact <u>fisma-corporate-reporting@ec.europa.eu</u>.

### Part I - The EU framework for high quality and reliable corporate reporting

The EU framework for corporate reporting has developed significantly since the EU adopted the <u>fourth company law Directive (Directive 78/660/EEC)</u> which coordinated the national provisions on the presentation, content and publication of annual accounts and management reports of limited liability companies. This Directive also already required a statutory audit of the annual accounts of limited liability companies.

Today, the Accounting Directive 2013/34/EU, the Statutory Audit Directive (2006/43/EU) and Audit Regulation (537 /2014) and the Transparency Directive 2004/109/EC provide the main requirements that ensure the quality of corporate reporting and its enforcement in the EU. Moreover, the ESMA Regulation (EU)1095/2010 gives tasks to ESMA in relation to corporate reporting. Given the inclusion of the Transparency Directive in the scope of the ESMA Regulation ESMA can make use of its powers in the ESMA Regulation, such as to issue guidelines.

The main elements of this framework that guarantee the quality and reliability of corporate reporting can be summarised as follows

• Corporate governance:

Responsibility of company boards for corporate reporting; the establishment by PIE's of an audit committee to minimise risks and to enhance the quality of financial reporting

- A u d i t :
  The requirements for a statutory audit of the annual accounts to ensure that there are no material misstatements
- S u p e r v i s i o n :
   The supervision of statutory auditors and audit firms to ensure the quality of audits and the supervision of corporate reporting by listed companies to ensure the quality of corporate reporting

The three pillars of the corporate reporting framework can be mutually reinforcing. At the same time, weaknesses in one pillar also negatively impact other pillars. Appropriate responsibilities and supervision of company boards provide incentives to company boards to focus on the quality of their corporate reporting. It will also incentivise them to see statutory audit not as a burden, but as an important external check by statutory auditors. On the other hand, where company boards are insufficiently accountable and supervised, there is a risk that boards may pay insufficient attention to the quality of reporting and that they provide insufficient resources for a proper audit.

Question 1. As a user of corporate reporting (retail or wholesale investor, credit rating agency, NGO, public authority, employees, suppliers, other stakeholders), what is the relative importance of the information contained therein compared to other sources of information?

Question 2. How do you assess the overall effectiveness, efficiency, relevance, coherence and EU added value of the EU legislation, considering each of the pillars underpinning corporate reporting individually, but also in combination with each other?

Question 2.1 Please describe the main issues that you see, if any, in the four areas mentioned in question 2 and in the eco-system composed of all four areas. Where possible, please provide concrete examples and evidence supporting your assessment.

You may want to consider the following aspects

- have any factors reduced the effectiveness / rendered the relevant EU framework less effective than anticipated? Which rules have proven less effective than anticipated?
- is there room to improve efficiency via further simplification?
- are existing provisions coherent with each other?

2000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

As regards the Danish capital market we see no general quality problem and no general loss of confidence calling for immediate EU actions regarding corporate governance, audit or supervision.

The <u>ESMA report on enforcement and regulatory activities of European enforcers in 2020</u> notes that supervisors undertook the examination that year of 729 financial statements drawn up in accordance with International Financial Reporting Standards (IFRS). Based on these examinations, European enforcers took enforcement actions against 265 issuers in order to address material departures from IFRS. This represents an action rate of 38%.

As regards the audit sector the <u>Commission's market monitoring report</u> highlights deficiencies in audit firms' internal quality control systems, but also in individual files for audits of PIEs. National audit oversight bodies also report that part of statutory audits is not up to standards.

Question 3. Based on your own experience how do you assess the quality and reliability of corporate reporting by listed EU companies?

1	-	Very	low

2 - Low

3 - Medium

- 4 High
- 5 Very high
- Don't know / no opinion / not applicable

## Question 3.1 Please provide concrete examples and evidence supporting your assessment in question 3 and explain the consequences that the quality and reliability of corporate reporting or lack thereof has on you.

2000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

As regards the Danish capital market we see no general quality problem and no general loss of confidence calling for immediate EU actions.

In ESMAs report, "Enforcement and regulatory activities of European enforcers in 2020" it is stated that the enforcement of 207 Danish issuers filing both annual and semi-annual report resulted in 4 cases with corrections in future financial statements, 3 cases in a public corrective note, and in no cases it was found necessary to require reissuance of financial statements.

In this context please also notice that the Danish enforcers (Finanstilsynet and Erhvervsstyrelsen) carry out a thorough screening process of the Danish issuers' reports and make extensive use of risk indicators.

Question 4. There are no generally accepted standards or indicators to measure the quality of corporate reporting and of statutory audit, nor the effectiveness of supervision. In light of this, what are your views on the following questions?

	<b>1</b> (strongly disagree)	2 (rather disagree)	3 (neutral)	4 (rather agree)	5 (strongly agree)	Don't know - No opinion - Not applicable
Would it be useful to have specific indicators to measure the quality of corporate reporting, of statutory audits and the effectiveness of supervision?	•	©	©	•	•	•
Is it possible to have clear and reliable indicators to measure the quality of corporate reporting, of statutory audit and the effectiveness of supervision?	•	©	©	•	©	•
Should the European Commission develop indicators on the quality of corporate reporting, of statutory audits and the effectiveness of supervision?	•	0	©	•	0	•

Question 4.1 Please provide any further explanation supporting your views, and, where relevant, please suggest possible indicators of the quality and reliability of corporate reporting, statutory audit and supervision, where possible with concrete examples:

inc	luding spaces and line breaks, i.e. stricter than the MS Word characters counting method.
	As regards the Danish capital market we see no need for such quality indicators.

Question 5. In your view, should the Commission take action in the areas of the corporate governance pillar, the statutory audit pillar, the supervision of PIE auditors and audit firms and the supervision of corporate reporting to increase the quality and reliability of reporting by listed companies?

- Yes, there is a need to improve the some or all of the areas listed above
- Yes, there is a need to improve some or all of the areas listed above as well as other areas
- No, but there is a need to improve other areas than those listed above
- No, there is no need to take further action in any area
- Don't know / no opinion / not applicable

2000 character(s) maximum

Question 5.1 Please provide any further explanation supporting your views, and where appropriate describe what actions you would prioritise and why, with concrete examples:

2000 character(s) maximum including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

As regards the Danish capital market we see no need for EU actions.	

### Question 5.2 At what level should action be taken to improve the quality of corporate governance, audit, audit supervision and/or supervision of corporate reporting?

	<b>1</b> (strongly disagree)	2 (rather disagree)	3 (neutral)	4 (rather agree)	5 (strongly agree)	Don't know - No opinion - Not applicable
Companies themselves should take action to improve their reporting	•	0	0	•	©	•
Auditors themselves should take action to improve audits	•	0	©	0	©	0
Audit supervisors themselves should take action to improve their functioning	•	0	0	•	©	•
Individual Member States should take action if the situation in their market requires this	0	0	0	•	•	0
The EU should take action	•	0	0	0	0	0
Several of the above should take action	•	0	0	0	0	0

### Question 5.3 Please provide any further explanation supporting your views expressed in question 5.2:

000 character(s) maximum luding spaces and line breaks, i.e. stricter than the MS Word characters counting method.
As regards the Danish capital market we see no need for EU actions.

### Question 6. To what extent is there a need to modify the EU framework on corporate reporting to support the following objectives?

	(not at all necessary)	2 (rather not necessary)	3 (neutral)	4 (rather necessary)	5 (highly necessary)	Don't know - No opinion - Not applicable
I. The green transition	0	0	•	0	0	•
II. The digital transition	0	0	•	0	0	©
III. Facilitating doing business by SMEs	•	0	0	0	0	0
IV. Reducing burdens and/or simplification	0	0	0	0	0	0
V. Better corporate social responsibility, including tax transparency and fair taxation	0	0	•	0	0	0

### Question 6.1 Please provide, if needed, any further explanation supporting your views expressed in question 6:

2000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

As regards the green transition, digital transition and better CSR reporting actions are already taken in draft CSRD, draft ESAP regulation etc. No further actions seem necessary.

#### Part II - Corporate governance

The EU corporate governance framework focuses on the relationships between company boards, shareholders and other stakeholders, and therefore, on the way a company is managed and controlled. The framework consists of a combination of EU and Member State legislation and soft law, namely national corporate governance codes applied on a 'comply or explain' basis. It aims inter alia to provide protection for shareholders and other parties with a particular interest in companies, such as employees and creditors.

A <u>sustainable corporate governance initiative</u> is planned to be adopted by the Commission in 2021. (In addition, the <u>Commission's study on directors' duties and sustainable corporate governance, July 2020</u>, assesses the root causes of 'short termism' in corporate governance and discusses their relationship with current market practices and/or regulatory frameworks).

Key features of the EU framework on corporate governance that are relevant for corporate reporting are

- The collective responsibility of the members of the administrative, management and supervisory bodies of a company for drawing up and publishing annual financial statements and management reports
- The requirement for a statement by the persons responsible within the issuer that, to the best of their knowledge, the financial statements prepared give a true and fair view of the assets, liabilities, financial position and profit or loss of the issuer
- The requirement for PIEs to establish, in principle, an audit committee

Question 7. How do you assess the effectiveness, efficiency, and coherence of the key features of the EU framework on corporate governance, considering how they underpin quality and reliability of corporate reporting?

#### a) Board responsibilities for reporting

II. Efficiency: has the framework been cost efficient	©	•	•	•	•	•
III. Coherence with relevant EU rules	0	•	0	•	•	0

Question 7.1 Please describe the main issues you see, if any, as regards corporate governance and, where possible, please provide concrete examples and evidence supporting your assessment.

You may want to consider the following aspects

- are there factors that have reduced the effectiveness / rendered the relevant EU framework less effective than anticipated? Which rules have proven less effective than anticipated?
- is there room to improve efficiency via further simplification?
- are existing provisions coherent with each other?

2000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

As regards the Danish capital market we see no general quality problem and no general loss of confidence calling for immediate EU actions regarding corporate governance, audit or supervision.

In this context please also notice that Danish financial institutions, including credit institutions, have many additional corporate governance requirements in sector-special legislation making it even more irrelevant to take further actions towards Danish financial institutions.

Question 8. Considering the level of material departures from IFRS reported in the ESMA report on enforcement and regulatory activities of European enforcers in 2020, to what extent can such departures be attributed to deficiencies of the EU framework on corporate governance?

- 1 Not at all
- 2 To a limited extent
- 3 To some extent
- 4 To a large extent
- 5 To a very large extent
- Don't know / no opinion / not applicable

Question 8.1 Please explain the main issues you see, and, where possible, please provide concrete examples and evidence supporting your assessment:

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

According to the ESMA report 16 Danish issuers were examined in 2020, of which 4 cases resulted in corrections in future financial statements, 3 cases in a public corrective note, and 9 cases in no enforcement actions.

The vast majority (81 %) of the examined 16 reports were, however, taken out for further examination after a thorough screening of Danish issuers' reports and by extensive use of risk indicators. Thus, the 7 reports with material errors shall instead be seen in the context of 207 issuers filing both annual and semi-annual reports.

In our view this does not indicate a quality problem and does not call for EU actions. On the contrary it reflects high quality corporate reporting in Denmark and appropriate corporate governance -, audit - and supervision rules.

Question 9. How effective and efficient would the following actions be in increasing the quality and reliability of reporting by listed companies?

### a) Strengthen the (collective) responsibilities of the board / tasks for reporting / liability of boards for incorrect reporting

	(not at all effective/ efficient)	(rather not effective/efficient)	3 (neutral)	4 (rather effective/ efficient)	(very effective/ efficient)	Don't know - No opinion - Not applicable
I. Effectiveness	•	0	0	0	0	0
II. Efficiency in term of cost/benefits of action	•	0	0	0	0	0

### b) Require proper expertise of specific board members in relation to corporate reporting (internal controls, accounting framework, sustainability reporting, etc.)

As regards the Danish capital market we see no general quality problem and no general loss of confidence calling for immediate EU actions regarding corporate governance, audit or supervision.

In this context please also notice that Danish financial institutions, including credit institutions, have many additional corporate governance requirements in sector-special legislation making it even more irrelevant to take further actions towards Danish financial institutions.

#### Part III - Statutory audit

The overall objective of statutory audits is to ensure that financial statements are free from material misstatements and provide a true and fair view. The auditor has to identify and assess the risk of material misstatements and gather sufficient and appropriate audit evidence as the basis for his opinion that the financial statements provide a true and fair view and to publicly report on the results of his audit work. The EU audit rules promote audit quality and seek to ensure the independence of auditors and audit firms.

Therefore, the final objective of statutory audit is to contribute to the quality and reliability of financial statements of companies.

Question 10. How do you assess the effectiveness, efficiency and the coherence with other relevant EU frameworks of the key features of EU audit legislation in so far as it applies to PIE auditors and audit firms?

Danish financial institutions only have a limited number of audit firms to choose from. This is not solely due to EU legislation but a result of a special certication scheme managed by the Danish FSA.

The audit quality issues that occur most often at EU level are

- deficiencies in audit firms' internal quality control systems
- the lack of, or inappropriate, monitoring of high-risk audited entities
- and the lack of audit evidence and documentation.

### Question 13. To what extent can these quality issues be attributed to deficiencies in the EU legal and supervisory framework for statutory audit?

#### Part IV - Supervision of PIE statutory auditors and audit firms

National competent authorities are responsible for the approval and registration of statutory auditors and audit firms, the adoption of audit standards, quality assurance and investigative and administrative disciplinary systems.

At European level, the cooperation between competent authorities is organised within the framework of the <u>Committee</u> <u>of European Audit Oversight Bodies (the 'CEAOB')</u>. The CEAOB has different tasks aimed at supervisory convergence, but it has no power to take binding decisions (Article 30 Audit Regulation).

#### Part V - Supervision and enforcement of corporate reporting

The supervision and enforcement of corporate reporting refers to the examination by competent authorities of listed companies' compliance with the disclosure obligations stemming from the applicable reporting framework, as well as taking appropriate measures when infringements are identified.

Based on enforcement activities by national competent authorities, ESMA reports a significant level of material misstatements. In the follow up of the Wirecard case and based on its experience, ESMA recommended a number of actions to improve the enforcement of corporate reporting (see ESMA letter of 26 February 2021 to the Commissioner McGuinness on next steps following Wirecard - ESMA32-51-818).

The Transparency Directive includes a number of requirements relating to supervision of corporate reporting

- the designation of a central competent authority in each Member State. For the enforcement of corporate reporting, Member States may designate a competent authority other than the central authority and/or delegate tasks to other entities
- national central competent authorities must be independent from market participants. There are no specific
  provisions as regards the independence of other designated authorities. As regards entities with delegated
  tasks, the entity in question must be organised in a manner such that conflicts of interest are avoided and
  information obtained from carrying out the delegated tasks is not used unfairly or to prevent competition
- Member States must provide competent authorities with certain powers, including investigative powers
- ESMA is tasked to foster supervisory convergence as regards the enforcement of financial statements prepared in accordance with the IFRS. For this purpose it has adopted in <a href="2014 guidelines">2014 guidelines on the enforcement of financial information</a>

This part of the consultation complements the <u>Commission targeted consultation on the supervisory convergence and</u> the Single Rulebook from 12 March 2021 to 21 May 2021.

Question 18. Considering the level of material departures from IFRS in the financial statements of listed companies found in the <u>ESMA report on enforcement and regulatory activities of European enforcers in 2020</u>, how would you rate (on a scale of 1 to 5) the degree to which such departures can be attributed to deficiencies in the EU supervisory framework?

More transparency on enforcement decisions, including easy access to a central database with all decisions segmented by topics/standards will make it easier for the issuers to comply not only with the accouning rules but also with the enforcers' previous decisions. Giving issuers and auditors access to the EECS-database already in place would be an obvious first step.
